

When cutting the mat board to fit the picture, cut the opening approximately one to two inches smaller than the picture itself. The picture will be enveloped inside two pieces of mat board, so the edges of your picture will not be visible.

The thick dark line in the illustration above is the outline for the picture. The thinner dark lines illustrates the mat board. This thick dark line would be enveloped between or under the thinner dark lines.

When attaching the back piece of mat board to the front piece of mat board, any means in which you do this will be acceptable. Suggestion: masking tape.
